

Project Administration: Delivered On Time & On Budget

UNMATCHED EXPERIENCE

Our team's experience is unmatched in the industry. We bring all of the qualifications needed to deliver results. Your DC Project Team will include: On-site Foreman, Construction Superintendent, Project Manager, Safety Manager, Director of Utility Services, Professional Engineer, and President & CEO.

CONSTRUCTION SOLUTIONS

On-site experts to evaluate conditions in the field when they vary from the plan.

Constant communication to the owner and the public.

Quality control to make sure our work is delivered within or above industry standards.

The DC Team is the best total package in the Southern Indiana and Louisville market for your infrastructure project. When you hire the DC Team you can expect:

PRE-CONSTRUCTION

The DC Team delivers comprehensive due diligence prior to construction, which we call the DC 100-Point Pre-Construction Review. Our common sense approach includes: constructability review, conflict analysis, obstacle evaluation and identification, total utility coordination, permit and approval review, safety hazard review, and schedule review. We will also coordinate a project kickoff meeting with all parties involved, as well as home and business owners if construction will be affecting them.

DURING CONSTRUCTION

During construction, you can expect to receive weekly progress updates and schedule progress. We will host a monthly progress meeting with the owner to give schedule updates, photos, quantities and milestones. Additionally, we will attend public meetings and provide updates if necessary.

POST CONSTRUCTION

DC facilitates a completion walk through of the project to ensure customer satisfaction. Additionally, we provide as-built drawings on the project to the project owner, and do a warranty check to confirm that after time has passed your project still operates as desired.
